Professional Summary

Experienced software engineer proficient in Java, Scala, and C# .NET, with expertise spanning diverse business domains. Skilled in translating requirements into technical solutions, maintaining, and debugging applications. Eager to learn through practice and research, continuously updating knowledge. Collaborative team player adept at integrating back-end and front-end components.

Skills

- Java, Spring Boot, C#, ASP.NET, Scala
- Microservices, Monolith, Agile, TDD, Hexagonal Architecture, CQRS, Kafka
- Oracle Database (PL/SQL), PostgreSQL, MySQL, MSSQL, ElasticSearch.
- GitLab, SonarQube, Jenkins, Tomcat, Docker, Azure, AWS, K8s, ArgoCD, HELM, Jira
- Angular, JSP/JSTL, HTML, CSS, JavaScript
- Git, Linux, UML, Maven, SBT, Gradle, Protobuf

Work Experience**Software Developer****ZorgDomein**

Sep 2023 - Present

- Developed and maintained the Transfer healthcare back-end application, enhancing patient care using Scala 2.13, Akka HTTP, Kafka with Protobuf, K8s, and a hexagonal architecture with TDD mindset.
- Used the CQRS pattern to separate read and write operations for improved performance and implement logic in the command and query handlers, such as validation, error handling, and interaction with databases.
- Used Grafana for visualizing collected metrics through the OtelMonitor and Prometheus.
- Collaborated closely with functional analysts, product designers, and frontend teams, participating in design discussions, conducting code reviews, and coordinating deployment using GitLab CI/CD and modified pipelines by updating the Terraform files.
- Collaborated with DevOps and cross-functional teams for integrations, pipeline modifications, migrations, etc.

Technical Team Lead / Full Stack Developer**HCL Technologies**

Jan 2022 - Apr 2023

- Designed, implemented, and maintained a RESTful web application for insurance using Java, Spring Boot framework, and JPA (Java Persistence API), applying the functional

programming paradigm within an MVC architecture with TDD mindset. Enhanced code quality and maintainability through rigorous analysis with SonarQube.

- Orchestrated deployment using Azure and customized pipelines using YAML files, alongside managing artifacts with Amazon S3.
- Engaged in analysis meetings with end-users, facilitating demos to gather requirements effectively.
- Collaborated closely with cross-functional teams to integrate various components seamlessly, ensuring robust functionality and user satisfaction.

Technical Team Lead

Dotin

Aug 2013 - Oct 2021

- Utilized Java 7 and 8, incorporating Hibernate 3 for object-relational mapping and persistence. Applied object-oriented design principles using the MVC pattern with JSP.
- Implemented core banking domains such as letters of credit, bills of exchange, clean payments, SWIFT, dealing management systems, loans, mortgages, and various payment types such as deferred, sight, and partials.
- Used to create ERD diagrams and normalize data definition or conceptual data models.
- Utilized tools including Gradle 3.0, Oracle 11, Jenkins, SVN, Git, and Tomcat 7.
- Participated in analysis sessions with product and domain managers to align technical solutions with business requirements.
- Implemented UI testing using Selenium, Robot framework, and JUnit for robust application testing.
- Collaborated closely with DevOps and cross-functional teams to ensure seamless integration and deployment processes.
- Conducted 360-degree evaluations, one-to-one sessions with team members, and interviews with new candidates and facilitate the user setups providing technical leadership, support, and bug fixing.

Senior Software Engineer

NCG

Aug 2011 - Aug 2013

- Developed and maintained ERP web applications, translating user requirements into technical solutions using Java 1.5, the Spring framework, and Oracle database and DWR and JSP with HTML and JavaScript.
- Trained junior team members.

C# .Net Developer

Telmar

Dec 2010 - Apr 2011

- Implemented and maintained features for ERP and MIS systems utilizing C# and ASP.NET and MSSQL.

Stack: C#, ASP.NET, MSSQL, NUnit, Visual Studio

C++ Developer

Bahar Sound

Dec 2008-Dec 2009

- Implemented new feature and maintained Windows based learning platform application with C++ native and OOP design and MSSQL DB and VOIP standards.
- Generated and deployed manually applications via ftp on servers.

Freelance Projects

ViraCam

Jun 2018 - Sep 2018

- Analyzed, designed and developed an e-commerce application for a camera webshop using Java 8, Spring Boot, MySQL, Ionic, and Angular.

Accounting

Jan 2006 - May 2007

- Designed and developed a Windows accounting software system using C# .NET 4.0 and MSSQL database contains sell, buy, employee timesheet, costs, products, various accounting reports.

Education

Bachelor of Information Technology, University of Applied Science and Technology, 2004 - 2008

Languages

- **English:** Full Professional Proficiency
- **Persian:** Native or Bilingual Proficiency
